Re: Revision of Dwelling Insurance Rates
and Dwelling Insurance Territory Definitions

Dear Sir:

Enclosed herewith for filing on behalf of all member companies of the North Carolina Rate Bureau are revised premium rates and revised territory definitions for dwelling insurance subject to the jurisdiction of the North Carolina Rate Bureau.

The enclosed memoranda and exhibits set forth and explain the calculations for needed rate level changes that have been capped by territory to produce an overall filed statewide average rate level change of +19.6% for dwelling insurance. The filing shows the revised territory definitions, which are the same as the territory definitions for homeowners insurance. The filing also shows revised rate levels varying by territory within the state based on those revised territory definitions, revised windstorm and hail exclusion credits and revised wind mitigation credits.

The foregoing changes were calculated based on rates currently in force and reflect consideration, duly given, to data for the experience period set forth herein. In preparing this filing, due consideration has been given to the factors specified in G.S. 58-36-10(2).

Information and statistical data required pursuant to G.S. 58-36-15 and 11 NCAC 10.1105 are shown and referenced in Section E. Additionally, the prefiled testimony of (a) Robert J. Curry, Vice President - Insurance Services Office; (b) Brian Donlan, Allstate Insurance Company, Chairman, Property Rating Subcommittee; (c) Elizabeth Henderson, Managing Director – Aon Benfield; (d) Robert C. Fox, Managing Director – Aon Benfield; (e) Dr. James Vander Weide – Financial Strategy Associates; (f) Dr. David Appel, Director - Milliman USA; and (g) Paul Anderson, Director – Milliman USA are submitted herewith. Further, information which is not currently required but which will be required in the future by legislation enacted earlier this year is shown in Exhibit RB-1, Section G.

We propose that the revised rates and territory definitions become effective according to the following rule of application:

> These changes are applicable to all new and renewal policies becoming effective on or after July 1, 2017.

Your approval of these changes is respectfully requested.

Very truly yours,

Raymond F. Evans, Jr. CPCU
General Manager

DETERMINATION OF RATES TO BE CHARGED INDIVIDUAL INSUREDS

The filed base rates by territory are shown on pages B-1 and B-2. These are the filed manual rates for the classification carrying a unity differential. The revised rates for the remaining classifications are determined by applying the established classification rate differentials to the base rates by territory.

RULE A3.
WINDSTORM OR HAIL EXCLUSION – TERRITORIES 110, 120, 130, 140, 150 AND 160 ONLY

Formatted: Not Highlight

Territory	Const.*	Building Credit	Contents Credit

DWELLING FIRE INSURANCE

STATEWIDE RATE REVIEW

(a) Incurred losses have been adjusted by the following loss development factors:

Year Ended	Loss Development Factor
12/31/09	1.000
12/31/10	1.000
12/31/11	0.998
12/31/12	0.994
12/31/13	0.969

(b) The trended loss adjustment expenses have been calculated to be 8.5% of the incurred losses for Fire. This factor is developed on page D-26 and D-29.

(c) The development of Current Cost/Amount Factors is shown on page D-18.

(d) The development of the Composite Projection Factor is shown on pages D-19.

(e) The Average Rating Factor is the ratio of average rate at current manual level and average current base rate.

(f) The weighted trended loss cost is the sum of the products, by year, of the trended loss costs and the accident year weights.

(g) The development of fixed expense per policy is shown on page D-29.

(h) The development of the expected loss and fixed expense ratio is shown on page D-25.

(i) Compensation for Assessment Risk is the provision for the potential residual market assessment. (See testimony of D. Appel. and P. Anderson)

(j) The anticipated deviation of 3.95% was selected by the North Carolina Rate Bureau. (See page D-32 and testimony of P. Anderson, R. Curry, and B. Donlan.)

(a) Incurred losses excluding hurricane have been adjusted by the following loss development factors:

Year Ended	Loss Development Factor
12/31/09	1.001
12/31/10	1.004
12/31/11	1.005
12/31/12	1.009
12/31/13	1.028

(b) Excess losses are calculated on page D-31.

(c) The trended loss adjustment expenses have been calculated to be 9.5% of the non-hurricane incurred losses for Extended Coverage. This factor is developed on pages D-28 and D-29.

(d) The excess factor is calculated on page D-30.

(e) The development of Current Cost/Amount Factors is shown on page D-21.

(f) The development of the Composite Projection Factor is shown on page D-22.

(g) The Average Rating Factor is the ratio of average rate at current manual level and average current base rate.

(h) The weighted trended loss cost is the sum of the products, by year, of the trended loss costs and the accident year weights.

(i) The modeled hurricane base class loss cost is calculated by dividing modeled losses of $80,658,556 by the product of latest year earned house years, average rating factor, current amount factor and premium projection factor. Using the latest year exposures, Aon Benfield developed modeled losses by blending the results of the AIR and RMS hurricane models. The resulting losses are adjusted by Aon Benfield for trend and hurricane specific LAE. They are shown on page D-35.

(j) The development of fixed expense per policy is shown on page D-29.

(k) The development of the expected loss and fixed expense ratio is shown on page D-27.

(l) Compensation for Assessment Risk is the provision for the potential residual market assessment. (See testimony of D. Appel, and P. Anderson)

(m) Net Cost of Reinsurance per Policy is the expense and profit component of the reinsurance premium paid by the primary insurers. (See statewide total on page D-37 and the testimony of D. Appel and R. Fox.)

(n) The anticipated deviation of 1.1% was selected by the North Carolina Rate Bureau. (See page D-32 and the testimony of, P. Anderson, R.Curry, and B.Donlan)

(d). Column (24) = [1 + (22)] * [1 + Class page (20) Contents] / [1 + Class page (20) total] - 1

NORTH CAROLINA

DWELLING INSURANCE

SELECTION OF RATE LEVEL CHANGES

In order to mitigate the effects of large rate changes on policyholders, the Governing Committee selected a maximum combined Fire/Extended Coverage rate change of 35% for each class in each territory as follows:

- For each territory, the Fire change was selected equal to the indicated change.
- In territories where the combined Fire/Extended Coverage indicated change was less than 35%, the Extended Coverage change was also selected equal to the indicated change.
- In territories where the combined Fire/Extended Coverage indicated change was greater than 35%, the Extended Coverage change was selected such that the combined Fire/Extended Coverage change equaled 35%.

NORTH CAROLINA

DWELLING INSURANCE

DERIVATION OF WIND EXCLUSION CREDITS

The filed wind exclusion credits, Page B-2, are based on the following formula:

$$C = I - \frac{\frac{Ld + F}{(1 - V)R} \times i + dB}{(1 - D)}$$

C = indicated credit

I = indicated rate

F = provision in filed rates for fixed expenses (territory trended fixed expense ratio divided by the filed territory buildings or contents rate level change)

V = provision in filed rates for variable expenses

R = territory risk load factor = (1 - statewide variable expense loading) / (1-V). The statewide variable expense loading is 23.8%.

r = net cost of reinsurance expressed as a variable expense

L = provision in filed rates for losses and loss adjustment expense = 1.0 – V – F – r

d = percentage of losses remaining after wind losses are excluded

i = indicated rate excluding compensation for assessment risk and deviations

B = compensation for assessment risk

D = deviation loading

The d values used in this calculation are obtained by the following formula:

$$d = \frac{N}{N + W}$$, where

N = 5-year average annual non-wind losses

W = X + Y, where

X = 2013 modeled hurricane losses; and

Y = 5-year average annual non-hurricane wind losses

SECTION D - EXPLANATORY MATERIAL

NORTH CAROLINA

DWELLING INSURANCE

EXPLANATORY MEMORANDUM

This memorandum supplements the filing letter and supporting exhibits setting forth a revision of Dwelling insurance rates in the State of North Carolina. It is the purpose of this memorandum to describe the source data used and to set forth in detail the insurance ratemaking procedures reflected in the filing. Certain pages in the filing and accompanying material contain a notation "all carriers" or other similar wording. This indicates that the data are combined ISO, ISS and NISS data. Data for certain companies are not included, as noted in Section E.

Premium and Loss Experience

This revision is based upon the combined premium and loss experience of all licensed companies writing Dwelling insurance in this State, except as noted in Section E. In order to have this experience available in all detail necessary for rate review and ratemaking in accordance with accepted standards, all such companies are required to file each year their total Dwelling insurance experience with the official statistical agents. Experience is recorded pursuant to the officially approved statistical plans and reported by the companies in accordance with instructions issued by the statistical agents under the Official Calls for Experience.

The Commissioner appointed the following statistical agents for the collection of Dwelling insurance experience in North Carolina: Insurance Services Office (ISO), Independent Statistical Service (ISS), American Association of Insurance Services (AAIS), and National Independent Statistical Service (NISS).

Experience utilized in the filing was collected under the Personal Lines Statistical Plan (Other Than Automobile), Personal Lines Statistical Agent Plan (Other Than Automobile) and the 2014 Official Statistical Programs of ISO, the Statistical Plan for Dwelling Fire and Extended Coverage Policies, Mobilehome Policies, and Dwelling Policies and the 2014 Statistical Programs of ISS, the Dwelling Statistical Plan developed by the NISS and the 2014 Statistical Programs of the NISS. In substance, the statistical plans of all statistical agents are similar in North Carolina, and provide for the recording and reporting of the experience in the detail required for ratemaking and in such form that the experience of all companies can be combined. The experience collected by AAIS and in the ISO Statistical Agent Plan is collected in lesser detail and has not been used in this review.

The licensing of an organization and its appointment as a statistical agent in the various states is predicated upon demonstration by the organization of its ability to perform this function. Moreover, the performance of the statistical agents is reviewed periodically through examination by personnel of state insurance departments under the convention examinations of the National Association of Insurance Commissioners. From time to time such organizations are called upon by Insurance Department examiners to verify, and do verify the data consolidated by them as statistical agents.

The insurance companies likewise are subject to a variety of checks and controls. Effective controls are maintained within the company over the activities of company employees connected with the company's statistics. Companies are required by statute to submit directly to the Insurance Department statistical and accounting information to be found in the Annual Statement and the Insurance Expense Exhibit. These documents are scrutinized by experienced Insurance Department personnel throughout the country. The insurance companies are also subject to examination by the Insurance Department, which examinations extend into the statistical records of the companies.

Tabulations of experience reported to the ISS and NISS are provided to ISO. ISO combines the experience and develops the analysis included in this filing. This work is performed at the direction of the North Carolina Rate Bureau.

Statewide Rate Level Exhibits

1. Experience

   Dwelling insurance experience was compiled on a calendar accident year basis for the years ended December 31, 2013, 2012, 2011, 2010, and 2009. For any twelve-month period, the accident year experience brings together the losses resulting from accidents occurring during that period with the premiums and number of dwellings "earned" during the same period. Since this filing utilizes catastrophe models to measure losses attributable to hurricanes, actual hurricane losses have been removed from the ratemaking experience.

2. Average Rating Factors

   Earned premiums at present rates are used to determine average rating factors. The average rating factor is the ratio of the average rate (earned premium at manual level divided by corresponding house-years) and the average current manual base rate. The average rating factor is used to convert the pure-premiums incurred during the experience period to the base level.

   For data which was available in sufficient detail, the earned premiums at present manual rates for the Dwelling insurance coverages are calculated by multiplying the number of insured dwellings earned during the experience period by the rates in effect at the time of review.

3. Losses

   Losses compiled for any accident year include paid losses as well as loss reserves. The amounts that will ultimately be required as payments of claims on open cases are carefully determined by the claim departments of the companies, and experience has shown that these determinations are highly accurate in the aggregate. Since, however, there are differences between the total incurred losses so determined and the amounts ultimately paid, the ratemaking procedure provides for a "development" of the incurred losses to a basis which, for all practical purposes, can be considered as the ultimate basis. This development is accomplished as follows:

Each year the experience is compiled for the latest five years, all valued as of three months after the close of the latest accident year period. Thus, the experience is reported for the latest year as of 15 months, the preceding year as of 27 months, the next preceding year as of 39 months, the third preceding year as of 51 months and the fourth preceding year as of 63 months all measured from the beginning of each accident year respectively.

From reports of prior years, similarly aged experience was obtained so that there are available 5 successive reports for the earliest year, 4 successive reports for the next earliest year, 3 successive reports for the middle year and 2 successive reports for the second most recent year.

Dwelling claims generally are settled at and are sufficiently matured as of 87 months, by which time nearly all incurred losses have been paid. From a comparison of the incurred losses for each year at successive valuation dates, it is determined what the rate of development has been in the past in order to calculate the development of less mature losses. This development is reflected in the incurred losses for the less mature years by the application of loss development factors. In this filing, loss development factors have been calculated based on the statewide experience of companies reporting to ISO, and are as follows:

	Factor to Develop to 87 Months	
Accident Year Ended	Fire	Extended Coverage
December 31, 2009	1.000	1.001
December 31, 2010	1.000	1.004
December 31, 2011	0.998	1.005
December 31, 2012	0.994	1.009
December 31, 2013	0.969	1.028

The derivation of the factors shown above is shown on pages D-12 and D-13. By applying these factors, the reported incurred losses have been adjusted to the amounts at which it is believed they will ultimately be settled.

In order to insure stability in rate levels while maintaining adequacy in the event of wide swings in hurricane and other losses, an excess procedure and hurricane loss models have been utilized for Extended Coverage. Hence, extreme shifts in rate level (both upward and downward), which might result from reflecting large hurricane and other losses only in the year in which they occur will be avoided. The incurred non-modeled excess losses are those losses which result from unusually severe loss activity (other than hurricane). They are removed from the experience used in developing rates. In order to reflect the impact of excess losses (that are not related to hurricanes and not accounted for in the hurricane models) on a long-term basis, the non-modeled losses are multiplied by an excess factor of 1.059. The derivation of the excess factor is shown on Page D-30. The derivation of the excess non-modeled losses is shown on page D-31. The modeled losses used in this filing are based on analysis performed by Aon Benfield on behalf of the North Carolina Rate Bureau. See page D-35 for details.

4. Loss Adjustment Expense

The Dwelling loss adjustment expenses, prior to trend considerations, are determined as an average percentage of the North Carolina incurred losses for calendar accident years 2010-2014 for Fire and Extended Coverage, based on a North Carolina expense call. The average is calculated using the five year period, removing the high and low values, and averaging the remaining three years. See pages D-26 and D-28.

A separate Loss Adjustment Expense factor was used for modeled hurricane losses. (See testimony of R. Fox.)

5. Fixed Expense

The fixed expense (general expenses and other acquisition expenses) is determined as an average percentage of North Carolina earned premiums for calendar accident years 2012-2014, based on a North Carolina expense call. See pages D-25 and D-27. The development of fixed expense per policy is shown on page D-29.

6. Loss Trend

Loss Trend is based on two indices; the CoreLogic Residential Index and the Modified Consumer Price Index. These indices are averaged (weighted 80% and 20%, respectively) and comprise the Current Cost Index.

The loss trending procedure is accomplished in two steps. In the first step Current Cost Factors are applied to each year's losses. The Current Cost Factors are derived from the external indices and, when applied to a given year's losses, translate these losses to a cost level which represents November 15, 2015. In order to trend losses from November 15, 2015 to one year beyond the assumed effective date of May 1, 2017, a Loss Projection Factor is applied. This projection factor is based on the annual change inherent in the latest twelve quarterly points of the Current Cost Index.

Since the external indices necessarily ignore the effect of policy deductibles, a First Dollar procedure to trend from the first dollar of loss is incorporated into the calculation of the Loss Projection Factor.

The procedures described above are displayed on pages D-14, D-15, D-16, D-19 and D-22.

7. Expense Trend

The average annual change in expenses is based on the All Items Less Energy Consumer Price Index and the Compensation Cost Index. The expected average annual change in expenses has been selected to be 2.0% by the Property Rating Subcommittee based on analysis and review of these data, which are displayed on pages D-23 to D-24.

8. Premium Trend

The historical average relativities are used to calculate an average annual change. This change is not based on a consistent set of insureds, since some of the growth is due to the addition of new homes. This rate of change is used to estimate the average relativity at the point in time corresponding to the midpoint of the latest quarter of the Current Cost Index (November 15, 2015). The Current Amount Factor for a given year is calculated as the ratio of the November 15, 2015 average relativity and the given year's average relativity. In order to calculate the Premium Projection Factor, the adjusted annual rate of change is compounded over the time period between November 15, 2015 and November 1, 2017 (six months beyond the assumed effective date). The calculation is shown on pages D-17-18 and D-20-21.

9. Trend Period

The effective date assumed in this filing for trend purposes is May 1, 2017. Given this effective date, the trend periods for premiums, losses and expenses are as follows:

- premiums are trended from January 1 of the given year to November 1, 2017.
- losses are trended from July 1 of the given year to May 1, 2018.
- general expense and other acquisition expense percentages, since they are based on 2012-2014 data, are trended from July 1, 2013 to November 1, 2017.
- loss adjustment expense percentages, since they are based on 2010-2014 data, are trended from July 1, 2012 to May 1, 2018.

10. Expected Loss and Fixed Expense Ratio

These quantities represent the portion of the premium income available for losses, loss adjustment expenses, general expenses and other acquisition expenses. They are determined from special calls for North Carolina expense experience and reflect the 2012, 2013, and 2014 results as reported by all companies licensed in North Carolina during those years. The breakdown of the expected loss and fixed expense ratios is set forth on page D-25 for Fire and page D-27 for Extended Coverage.

11. Net Cost of Reinsurance per Policy

This quantity represents the expense and profit component of the reinsurance premium paid by the primary insurers. (See testimony of D. Appel and R. Fox.)

DWELLING INSURANCE

EXPLANATORY MEMORANDUM

Class Rate Level Exhibits - Fire and Extended Coverage (pages C-5 and C-6)

1. Trended Adjusted Incurred Losses (column 1)

   Incurred losses for the latest five years, trended by year using Current Cost Factors and a Loss Projection Factor. For Extended Coverage, the excess loss procedure is incorporated into the incurred losses.

2. Trended Average Rating Factor (column 3)

   The Average Rating Factor trended by Current Amount Factors and a Premium Projection Factor.

3. Credibility (column 5)

   The five year loss cost by class is assigned a credibility value based on the number of house years underlying this loss cost. The standard for full credibility is 500,000 house years for Fire and 330,000 house years for Extended Coverage, with partial credibility equal to

   $$\sqrt{\text{five year house years / full credibility standard}}$$

   truncated to the nearest tenth. The complement of credibility is assigned to the statewide five year base loss cost adjusted by the ratio of the class' current base rate and the statewide average current base rate.

4. Modeled Base Loss Cost (column 7 - Extended Coverage)

   The modeled hurricane base-class loss cost is derived by dividing trended modeled class hurricane losses by the product of the average rating factor, house-years for the latest year, 2013 Current Amount Factors and Premium Projection Factors by class.

5. Indicated Base Loss Cost (column 7 - Fire, column 9 - Extended Coverage)

   The indicated base loss cost by class is the statewide base loss cost (computed on the statewide indications pages) adjusted by the class relativity indicated by the credibility weighted loss cost (ratio of class to statewide of column 6 for Fire or column 8 for Extended Coverage).

6. Indicated Net Base Rate (column 10 - Fire, column 12 - Extended Coverage)

   The indicated net base rate is the sum of the loss cost and fixed expense divided by the expected loss and fixed expense ratio derived on page D-25. The fixed expense is calculated as the average current base rate multiplied by the fixed expense ratio developed on page D-29.

7. Compensation for Assessment Risk per Policy (column 11 - Fire, column 13 - Extended Coverage)

   The compensation for assessment risk is reflected as a percentage of the base rate by class and is loaded for the effects of taxes and commission.

8. Net Cost of Reinsurance per Policy (column 14 - Extended Coverage)

   The net cost of reinsurance was allocated to class in proportion to modeled losses.

9. Indicated Base Rate Change (column 16 - Fire, column 19 - Extended Coverage)

   The indicated base rate level change is the ratio of required base rate and current base rate, minus 1.

10. Indicated Rate Change Balanced to Statewide (column 17 - Fire, column 20 - Extended Coverage)

    These are indicated base rate level changes adjusted to weigh down to the statewide indicated change.

DWELLING INSURANCE

EXPLANATORY MEMORANDUM

Territory Rate Level Exhibits - Fire (pages C-7-8)

1. Latest Year Earned Premium at Current Level (column 1)

   Earned premium for the latest year (2013), adjusted to the manual rate level in effect on January 1, 2017 (the effective date of the Revised Dwelling Rating Factors filing).

2. Five Year Experience Base Loss Cost (column 3)

   A five year experience base loss cost by territory is derived by dividing five year territory losses by the product of the five year average rating factor and five year house-years.

3. Credibility (column 5)

   The five year loss cost is assigned a credibility value based upon the number of house years underlying this loss cost. The standard for full credibility is 500,000 house years, with partial credibility equal to

   $$\sqrt{\text{five year house years} / \text{full credibility standard}}$$

   truncated to the nearest tenth. The complement of credibility is assigned to the statewide five year experience base loss cost adjusted by the ratio of the territory's current base rate and the statewide average current base rate.

4. Indicated Statewide Base Class Loss Cost (column 8)

   The indicated statewide base class loss cost is row 9 from the statewide indication.

5. Trended General and Other Acquisition Expenses (column 10)

   The trended general and other acquisition expense provision is the trended statewide provisions for these expenses multiplied by the ratio of statewide average rate to territory rate.

6. Expected Loss and Fixed Expense Ratio (column 12)

   These quantities represent the portion of the premium income available for losses, loss adjustment expenses, general expenses and other acquisition expenses.

7. Compensation for Assessment Risk per Policy (column 14)

   The compensation for assessment risk is reflected as a percentage of the base rate by class and is loaded for the effects of taxes and commission.

8. Indicated Rate Level Change (column 19)

   The indicated rate level change is the ratio of required base rate and current base rate, minus 1.

9. Indicated Rate Level Change Balanced to Statewide (column 20)

   These are indicated base rate level changes adjusted to weigh down to the statewide indicated change.

10. Indicated Buildings Rate Level Change (column 21)

    The indicated buildings rate level change is the product of the indicated rate level change balanced to statewide and the class relativity embedded in the indicated buildings base rate change balanced to statewide (column 17) on the class indications page.

11. Indicated Contents Rate Level Change (column 22)

    The indicated contents rate level change is the product of the indicated rate level change balanced to statewide and the class relativity embedded in the indicated contents base rate change balanced to statewide (column 17) on the class indications page.

NORTH CAROLINA

DWELLING INSURANCE

EXPLANATORY MEMORANDUM

Territory Rate Level Exhibits - Extended Coverage (pages C-9-10)

1. Latest Year Earned Premium at Current Level (column 1)

   Earned premium for the latest year (2013), adjusted to the manual rate level in effect on January 1, 2017 (the effective date of the Revised Dwelling Rating Factors filing).

2. Five Year Non-Modeled Experience Base Loss Cost (column 3)

   A five year experience base loss cost by territory is derived by dividing five year territory losses by the product of the five year average rating factor and five year house-years. The territory losses exclude hurricane losses and include an excess loss provision.

3. Credibility (column 5)

   The five year loss cost is assigned a credibility value based upon the number of house years underlying this loss cost. The standard for full credibility is 330,000 house years, with partial credibility equal to

   $$\sqrt{\text{five year house years / full credibility standard}}$$

   truncated to the nearest tenth. The complement of credibility is assigned to the statewide five year non-modeled experience base loss cost.

4. Modeled Hurricane Base Loss Cost (column 7)

   The modeled hurricane base loss costs (excluding LAE) are derived by dividing the trended modeled hurricane territory losses provided by Aon Benfield (which include LAE) by the product of the model LAE, model loss trend, average rating factor for the latest year, and house-years for the latest year, in order to be on the same basis as the non-modeled experience base loss costs. The development of these costs is presented on page D-36.

5. Indicated Statewide Base Class Loss Cost (column 10)

   The indicated statewide base class loss cost is row 13 from the statewide indication.

6. Trended General and Other Acquisition Expenses (column 12)

   The trended general and other acquisition expenses are the trended statewide provisions for these expenses multiplied by the ratio of statewide average rate to territory average rate.

7. Expected Loss and Fixed Expense Ratio (column 13)

   These quantities represent the portion of the premium income available for losses, loss adjustment expenses, general expenses and other acquisition expenses.

8. Compensation for Assessment Risk per Policy (column 15)

   The compensation for assessment risk is reflected as a percentage of the base rate by class and is loaded for the effects of taxes and commission.

9. Net Cost of Reinsurance per Policy (column 16)

   This quantity represents the expense and profit component of the reinsurance premium paid by the primary insurers. The development of this quantity is presented on page D-37. (See testimony of D. Appel and R. Fox.)

10. Indicated Rate Level Change (column 21)

    The indicated rate level change is the ratio of required base rate and current base rate, minus 1.

11. Indicated Rate Level Change Balanced to Statewide (column 22)

    These are indicated base rate level changes adjusted to weigh down to the statewide indicated change.

12. Indicated Buildings Rate Level Change (column 23)

    The indicated buildings rate level change is the product of the indicated rate level change balanced to statewide and the class relativity embedded in the indicated buildings base rate change balanced to statewide (column 20) on the class indications page.

13. Indicated Contents Rate Level Change (column 24)

    The indicated contents rate level change is the product of the indicated rate level change balanced to statewide and the class relativity embedded in the indicated contents base rate change balanced to statewide (column 20) on the class indications page.

NORTH CAROLINA

DWELLING INSURANCE

EXPLANATORY MEMORANDUM

Credibility Factor Determination

Credibility considerations enter into the Dwelling insurance ratemaking formulas.

The credibility procedure is based on the 'frequency with severity modification' model discussed in "Credibility of the Pure Premium" by Mayerson, Bowers and Jones. The full credibility standard is based on a normal distribution with a 90% probability of meeting the test and a 10% maximum departure from the expected value, translated to house year standards. Partial credibility (Zp) is calculated as follows:

$$Z_p = \sqrt{\text{five year house years / full credibility standard}}$$ (truncated to the nearest tenth)

The full credibility standards are 500,000 house years for Fire and 330,000 house years for Extended Coverage.

On a statewide and class basis, both Fire and Extended Coverage are fully credible.

On a territory basis, partial credibility may be employed. In that case, the calculation of the rate level indication incorporates credibility as follows: credibility is applied to the five year (non-hurricane for Extended Coverage) territory loss costs and (1 - credibility) to the complement of credibility.

SECTION E
SUPPLEMENTAL MATERIAL

NORTH CAROLINA
DWELLING INSURANCE

SUPPLEMENTAL MATERIAL

North Carolina G.S. 58-36-15(h) specifies that the following information must be included in all policy form, rule and rate filings filed under Article 12B. 11 NCAC 10.1105 specifies that additional detail be provided under each of these items. These materials are contained on the pages indicated.

Item	Page
1. North Carolina earned premiums at actual and current rate levels; losses and loss adjustment expenses, each on a paid and incurred basis; the loss ratio anticipated at the time rates were promulgated for the experience period.	E-3-47
2. Credibility factor development and application.	E-48
3. Loss development factor derivation and application on both paid and incurred bases and in both dollars and numbers of claims.	E-49
4. Trending factor development and application.	E-50
5. Changes in premium base resulting from rating exposure trends.	E-51
6. Limiting factor development and application.	E-52
7. Overhead expense development and application of commission and brokerage, other acquisition expenses, general expenses, taxes, licenses and fees.	E-53-55
8. Percent rate change.	E-56
9. Final proposed rates.	E-57
10. Investment earnings, consisting of investment income and realized plus unrealized capital gains, from loss, loss expense and unearned premium reserves.	E-58-88
11. Identification of applicable statistical plans and programs and a certification of compliance with them.	E-89-95
12. Investment earnings on capital and surplus.	E-96
13. Level of capital and surplus needed to support premium writings without endangering the solvency of member companies.	E-97
14. Additional supplemental information (as per 11 NCAC 10.1105)	E-98-101

STATISTICAL DATA TO COMPLY WITH NORTH CAROLINA
REQUIREMENTS FOR A DWELLING INSURANCE RATE FILING
AS PER 11 NCAC 10.1105

1. NORTH CAROLINA EARNED PREMIUMS AT THE ACTUAL AND CURRENT RATE LEVEL, LOSSES AND LOSS ADJUSTMENT EXPENSES, EACH ON PAID AND INCURRED BASES WITHOUT TRENDING OR OTHER MODIFICATION FOR THE EXPERIENCE PERIOD, INCLUDING THE LOSS RATIO ANTICIPATED AT THE TIME THE RATES WERE PROMULGATED FOR THE EXPERIENCE PERIOD

	Earned premiums at collected and current levels.	E-3
	Paid/incurred losses and loss adjustment expense.	E-4
	Anticipated loss ratios.	E-5
(a)	Companies excluded - rate level, trend, loss development, relativity, and investment income.	E-6
(b)	Not applicable to Dwelling Fire and Extended Coverage insurance.	E-7
(c)	Adjustments to premium, losses, loss adjustment expenses, expenses and exposures.	E-8
(d)	Actual earned premiums and calculation of earned premium at present rates.	E-9
(e)	Written and earned premiums and market shares for the ten largest writers.	E-10-11
(f)	Composite loss and premium information from each of the latest two annual statements for the 50 largest writers.	E-12
(g)	Deviations.	E-12
(h)	Dividends.	E-12
(i)	Losses and loss adjustment expenses.	E-13
(j)	Not applicable to Dwelling Fire and Extended Coverage insurance.	E-14
(k)	Excess (catastrophe) and nonexcess (noncatastrophe) losses.	E-15
(l)	Losses by cause.	E-16-46

Exhibit (1)

NORTH CAROLINA
DWELLING INSURANCE

EARNED PREMIUMS AT ACTUAL AND CURRENT RATE LEVEL

I. EARNED PREMIUM AT COLLECTED LEVEL

Year	Fire	Extended Coverage
2009	$ 76,530,080	$ 111,244,031
2010	78,535,200	112,338,979
2011	83,538,083	111,424,847
2012	88,755,596	114,312,699
2013	93,119,485	122,459,986

II. EARNED PREMIUM AT CURRENT LEVEL

Year	Fire	Extended Coverage
2009	$ 75,214,598	$ 169,040,792
2010	77,595,300	171,013,496
2011	83,446,189	179,018,560
2012	88,767,117	186,388,689
2013	93,002,471	190,064,108

PAID/INCURRED LOSSES AND ALLOCATED LOSS ADJUSTMENT EXPENSE

I. PAID LOSSES

The Rate Bureau is advised by ISO that paid loss and loss adjustment expenses are not available for the experience period of this filing.

II. INCURRED LOSSES (a)

Year	Fire	Extended Coverage
2009	$ 35,324,067	$ 29,913,216
2010	38,950,200	38,059,436
2011	35,486,449	190,029,145
2012	39,015,415	46,847,024
2013	38,022,726	37,676,888

(a) Incurred losses are developed, adjusted to a common deductible of $500, include actual hurricane losses and do not include loss adjustment expense. These expenses are reflected via a factor. For Fire this factor is 8.6%. For Extended Coverage non-modeled losses this factor is 9.7%.

NORTH CAROLINA
DWELLING INSURANCE

ANTICIPATED LOSS AND LOSS ADJUSTMENT EXPENSE RATIOS

The anticipated loss and LAE ratios included in the 2011 filing (for rates implemented in 2012) were 0.716 for Fire, and 0.754 for Extended Coverage.

Exhibit (1)(a)

NORTH CAROLINA
DWELLING INSURANCE

EXCLUDED COMPANIES

(The market shares shown are based on 2013 Dwelling Fire and Extended Coverage written premium.)

The historical experience used to develop the statewide rate-level indications, territory rate-level indications and class indications is based on the experience of companies and residual market entities reporting to the Insurance Services Office (full statistical plan), the Independent Statistical Service, and the National Insurance Statistical Service. The historical premium and loss experience utilized in this filing, after accounting for the premium and loss experience of reporting companies whose data were not included (as described below) accounts for 98.2% of the total North Carolina Dwelling insurance market. The experience reported to the American Association of Insurance Services and to Insurance Services Office under the Statistical Agent Plan is excluded because it is not available in sufficient detail. This experience accounts for approximately 0.30% of the total North Carolina Dwelling insurance market.

Premium and loss experience for the following insurers is not included in the filed experience: Bankers Standard Insurance Company, Cincinnati Insurance Company, Federal Insurance Company, Hanover Insurance Company, State Auto Property and Casualty Insurance Company, and Universal North America Insurance Company. The experience for these companies was not included pending resolution of data anomalies.

The loss development factors used in the calculation of the statewide rate level indications are based on ISO North Carolina experience. This experience represents 24.6% of the market. See also the prefiled testimony of R. Curry, P. Anderson and B. Donlan.

Not applicable to Dwelling insurance.

Exhibit (1)(c)

NORTH CAROLINA
DWELLING INSURANCE

ADJUSTMENTS TO PREMIUMS, LOSSES, LOSS ADJUSTMENT EXPENSES, EXPENSES AND EXPOSURES

Adjustments made to premiums, losses, loss adjustment expenses, and expenses are set forth below and in the prefiled testimony of R. Curry, P. Anderson, B. Donlan, R. Fox, and E. Henderson.

Losses are adjusted to the $500 base deductible level by application of loss elimination ratios. These factors are applied on a record-by-record basis and vary by cause of loss.

Losses were developed to an ultimate basis through the application of loss development factors.

Additionally, due to the volatile nature and the catastrophic potential of hurricane losses, they have been removed from the actual data. A separate provision for hurricane losses was included based on modeled hurricane losses developed by Aon Benfield.

Exhibit (1)(d)

NORTH CAROLINA
DWELLING INSURANCE

EARNED PREMIUM AT PRESENT RATES CALCULATION

Earned premium at present rates by coverage is calculated by the following formula for each exposure:

Fire Premium = Territory Base Rate x Amount of Insurance Factor x Optional Coverage Factor

Extended Coverage Premium = Territory Base Rate x Amount of Insurance Factor x Optional Coverage Factor

The results are then summed over all territories to generate aggregate earned premium at present rates.

A sample calculation for a single insured is shown below. This sample insured is in territory 230 (former territory 41), Coverage A, $30,000 amount of insurance, protection class 8, masonry construction, Extended Coverage policy form 1.

Fire:

(1)	Territory 230, Coverage A, protection class 8, masonry construction base rate	76
(2)	Amount of insurance factor for $30,000	1.60
(3)	Optional Coverage Factor	1.00
(4)	Earned premium at present rates (1)x(2)x(3)	121.60

Extended Coverage:

(1)	Territory 230, Coverage A, masonry construction, policy form 1 base rate	48
(2)	Amount of insurance factor for $30,000	1.79
(3)	Optional Coverage Factor	1.00
(4)	Earned premium at present rates (1)x(2)x(3)	85.92

The results of these two calculations are then summed to obtain the one earned premium at present rates required for the statewide, territory and class rate level analyses.

STATISTICAL DATA TO COMPLY WITH NORTH CAROLINA
REQUIREMENTS FOR A DWELLING INSURANCE RATE FILING
AS PER 11 NCAC 10.1105

2. CREDIBILITY FACTOR DEVELOPMENT AND APPLICATION

The volume of North Carolina data is sufficiently large that it is fully credible in both the statewide and class rate level reviews.

To distribute the statewide change by territory, a credibility procedure was used on the five year (non-hurricane for Extended Coverage) loss costs. The credibility standard used was based on the 'frequency with severity modification' model discussed in "Credibility of the Pure Premium" by Mayerson, Bowers and Jones. The full credibility standard is based on a normal distribution with a 90% probability of meeting the test and a 10% maximum departure from the expected value, translated to house years. The full credibility standards are 500,000 house years for Fire and 330,000 house years for Extended Coverage. Partial credibility is calculated using the square root rule:

$$\sqrt{\text{five year house years / full credibility standard}}$$

The Rate Bureau made a Dwelling Insurance rate filing in 2011 that used same credibility procedure.

See Section D and prefiled testimony of R. Curry, P. Anderson and B.Donlan

STATISTICAL DATA TO COMPLY WITH NORTH CAROLINA
REQUIREMENTS FOR A DWELLING INSURANCE RATE FILING
AS PER 11 NCAC 10.1105

3. LOSS DEVELOPMENT FACTOR DERIVATION AND APPLICATION ON BOTH PAID AND INCURRED BASES AND IN BOTH NUMBERS AND DOLLARS OF CLAIMS

(a)-(g) Not applicable to Dwelling insurance.

STATISTICAL DATA TO COMPLY WITH NORTH CAROLINA
REQUIREMENTS FOR A DWELLING INSURANCE RATE FILING
AS PER 11 NCAC 10.1105

4. TRENDING FACTOR DEVELOPMENT AND APPLICATION

(a) See Section D and prefiled testimony of R. Curry, P. Anderson and B. Donlan. The Rate Bureau made a Dwelling insurance rate level filing in 2011 that used the same loss trend procedure.

(b) See prefiled testimony of R. Curry, P. Anderson, and B. Donlan.

(c) Not applicable for Dwelling insurance.

STATISTICAL DATA TO COMPLY WITH NORTH CAROLINA
REQUIREMENTS FOR A DWELLING INSURANCE RATE FILING
AS PER 11 NCAC 10.1105

5. CHANGES IN PREMIUM BASE RESULTING FROM RATING EXPOSURE TRENDS

(a) See Section D and prefiled testimony of R. Curry, P. Anderson, and B. Donlan. The Rate Bureau made a Dwelling insurance rate level filing in 2011 that used same exposure trend procedure.

(b) Not applicable to Dwelling insurance.

6. LIMITING FACTOR DEVELOPMENT AND APPLICATION

(a), (b), (d) There were no limitations.

(c) See pages C-11 - C-13.

7. OVERHEAD EXPENSE DEVELOPMENT AND APPLICATION OF COMMISSION AND BROKERAGE, OTHER ACQUISITION EXPENSES, GENERAL EXPENSES, TAXES, LICENSES, AND FEES

(a) Exhibit (7)(a) provides all information relating to expense provisions contained in the filing. The Rate Bureau made a Dwelling insurance rate level filing in 2011 that used the same procedure for overhead expense development and application of commission and brokerage, other acquisition expense, general expenses, taxes, licenses and fees.

(b) Not applicable to Dwelling insurance.

(c) Not applicable to Dwelling insurance.

The following provides a description of the derivation of Dwelling insurance expense provisions. The underlying expense data are provided by the North Carolina Rate Bureau and are displayed on pages D-25-28.

The filed expense provision methodology makes a distinction between those provisions that require trending and those that do not. For example, since commission and brokerage, and taxes, licenses and fees vary directly with premium, no additional trend is required. In contrast, general expense, other acquisition expense, and loss adjustment expense do not vary directly with premium and are subject to trend.

The provisions for commission and brokerage expenses, 11.0% of written premium for Fire and 9.8/% of written premium for Extended Coverage, and the provisions for taxes, licenses, and fees, 2.8% of written premium for Fire and 2.5% of written premium for Extended Coverage, are based on the data shown on pages D-25 and D-27 for the years 2012-2014.

Since general expenses and other acquisition expenses are relative to earned premiums and loss adjustment expenses are relative to losses, separate trend factors are required for premiums, losses, and expenses.

Please note the trend calculations assume an effective date of 5/1/2017. During the filing assembly process, the NCRB determined that the requested effective date will actually be 7/1/2017.

General Expense and Other Acquisition Expense - Based on the 2012-2014 experience on pages D-25 and D-27, general expenses average 4.7% of earned premium for Fire and 4.5% of earned premium for Extended Coverage, and other acquisition expenses average 6.6% of earned premium for Fire and 7.6% of earned premium for Extended Coverage. Since these expenses are incurred throughout the twelve-month effective period, both the numerator and denominator of these factors are trended to 11/01/2017 (six months beyond the 5/1/2017 average effective date).

The average date of payment of the 2012-2014 expenses used to calculate the provisions is 7/1/2013. Similarly, the average date of earning of the 2012-2014 premiums is 7/1/2013. Assuming policies are written with an effective period of one year, the average date of writing is therefore six months earlier, or 1/1/2013. The average date of writing of policies under the proposed rates, and the average date of payment of the expenses on these policies, is six months after the assumed effective date of 5/1/2017, or 11/1/2017. Therefore, the expenses in the numerator are projected 52 months (from 7/1/2013 to 11/1/2017) and the premiums in the denominator are projected 71 months (from 1/1/2006 to 12/1/2011).

The trend factor for expenses in the numerator is based on the rates of change inherent in the Consumer Price Index and the Compensation Cost Index, displayed on pages D-23-24. Based on an equal weighting of the rates of change in these two indices, an average annual change of 2.0% was selected. This average annual change is projected 52 months (from 7/1/2013 to 11/1/2017).

To trend the premiums in the denominator, two multiplicative factors are applied: the 2012 Current Amount Factor and the Premium Projection Factor. Those factors are shown on pages D-18-19 and D-21-22.

Loss Adjustment Expense

Fire: Based on the 2010-2014 experience shown on page D-26, loss adjustment expense (both allocated and unallocated) average 8.6% of incurred losses. The average date of loss in these data is 7/1/2012. Both the numerator and denominator are trended 70 months, from 7/1/2012 to 5/1/2018 (12 months beyond the average effective date of 5/1/2017).

Extended Coverage: Based on the 2010-2014 experience shown on page D-28, loss adjustment expenses (both allocated and unallocated) average 9.7% of incurred losses. The average date of loss in these data is 7/1/2012. Both the numerator and denominator are trended 70 months, from 7/1/2012 to 5/1/2018 (12 months beyond the average effective date of 5/1/2017).

Please note that a separate loss adjustment expense factor is used for modeled losses. (See prefiled testimony of P. Anderson and R. Fox.)

The trend factor used for expenses in the numerator is determined in a similar way as for general and other acquisition expenses. The 2.0% selected average annual change is projected 70 months for Fire and Extended Coverage (from 7/1/2012 to 5/1/2018).

To trend the losses in the denominator, quantities that are calculated in the loss trend procedure are used. Two factors are applied. The first is the 2011 Current Cost Factor shown on page D-14. The second is the adjusted annual rate of change based on the CCI (page D-15). The adjusted annual rate of change is applied over the 29.5 month period from 11/15/2015 to 5/1/2018.

No alternate expense trend methodology has been considered within the last three years.

STATISTICAL DATA TO COMPLY WITH NORTH CAROLINA
REQUIREMENTS FOR A DWELLING INSURANCE RATE FILING
AS PER 11 NCAC 10.1105

8. PERCENT RATE CHANGE

The overall statewide rate change by coverage is shown on page A-1. The statewide rate changes are applied uniformly by coverage amount, protection class, construction and deductible.

The proposed rate changes are dependent on the actual implementation date of the new rates, because any such change will affect all of the trending periods used in the filing. Any change in the trending periods will affect all of the losses, fixed expenses, and premiums used in the calculation of the rate level indication.

If the effective date were to be changed, advance notice of one hundred twenty (120) days is required for an orderly implementation of the change in rates. This is the amount of time required to calculate the new rates based on the new effective date, and distribute the necessary information to member companies.

9. FINAL PROPOSED RATES

The proposed rates are shown in Section B.

NORTH CAROLINA
DWELLING FIRE AND EXTENDED COVERAGE INSURANCE

ESTIMATED INVESTMENT EARNINGS ON UNEARNED
PREMIUM RESERVES AND ON LOSS RESERVES

EXPLANATORY NOTES

Line A-1
Direct earned premiums are the earned premiums for Dwelling insurance in North Carolina from page 15 of the Annual Statement.

Line A-2
The mean unearned premium reserve is determined by multiplying the direct earned premiums in line (1) by the ratio of the mean unearned premium reserve to the collected earned premium for calendar year ended 12/31/14 for all companies writing Dwelling insurance in North Carolina. These data are from page 15 of the Annual Statement.

	Fire	EC
1. Collected Earned Premium for Calendar Year ended 12/31/14	$224,767,028	$215,645,897
2. Unearned Premium Reserve as of 12/31/13	108,296,002	97,612,198
3. Unearned Premium Reserve as of 12/31/14	108,709,303	109,909,322
4. Mean Unearned Premium Reserve 1/2 [(2) + (3)]	108,296,002	103,760,760
5. Ratio (4) ÷ (1)	0.4818	0.4812

Line A-3
Deduction for prepaid expenses:
Production costs and a large part of the other company expenses in connection with the writing and handling of Dwelling policies, exclusive of claim adjustment expenses, are incurred when the policy is written and before the premium is paid. The deduction for these expenses is determined from data provided by the NCRB for the year ended 12/31/14.

Line B-2
Delayed remission of premium:
This deduction is necessary because of delay in remission and collection of premium to the companies, which amounts to approximately 50-75 days after the effective dates of the policies. Therefore, funds for the unearned premium reserve required during the initial days of all policies must be taken from the company's surplus.

1. Agents' balances for premiums due less than 90 days as a ratio to net written premium (based on data for all companies writing Dwelling insurance in North Carolina)	0.1966	0.1861
2. Factor to include effect of agents' balances or uncollected premiums overdue for more than 90 days (based on data provided by A. M. Best)	1.021	1.021
3. Factor for agents' balances (1) x (2)	0.201	0.190

Line C-2

The expected loss and loss adjustment expense ratio reflects the expense provisions for the year ended 12/31/14.

Line C-3

The mean loss reserve is determined by multiplying the incurred losses in line (2) by the North Carolina ratio of the mean loss reserves to the incurred losses in 2014 for Dwelling insurance. This ratio is based on North Carolina companies' Page 15 annual statement data and has been adjusted to include loss adjustment expense reserves.

	Fire	EC
1. Incurred Losses for Calendar Year 2014	43,158,269	70,749,863
2. Loss Reserves as of 12/31/13	104,621,425	30,271,468
3. Loss Reserves as of 12/31/14	34,562,766	32,119,812
4. Mean Loss Reserve 2014: 1/2 [(2) + (3)]	69,592,096	31,195,640
5. Ratio (4) ÷ (1)	1.612	0.441
6. Ratio of LAE Reserves to Loss Reserves (a)	0.272	0.272
7. Ratio of Incurred LAE to Incurred Losses (a)	0.166	0.166
8. Loss and LAE Reserve [(5)x(1.0+(6))/(1.0+(7))]	1.759	0.481

(a) Based on 2014 All-Industry Insurance Expense Exhibit (source: A.M. Best)

Line E

The rate of return is the ratio of net investment income earned to mean cash and invested assets. Net investment income is computed for all companies writing Dwelling insurance in North Carolina as follows:

Year	Net Investment Income Earned	Mean Cash and Invested Assets	Rate of Return
2014	55,171,640	1,543,882,375	3.57%

Line H

The average rate of Federal income tax was determined by applying the average tax rate for net investment income and the current tax rate applicable to realized capital gains (or losses) to the rates of return as calculated above.

	Rate of Return	Federal Income Tax Rate
Net Investment Income Earned	3.57%	0.194

The average rate of Federal income tax was determined by applying current tax rates to the distribution of investment income earned for all companies. These data are for 2014 from Best's Aggregates and Averages, Underwriting and Investment Exhibit, Part 1, Column 8.

NORTH CAROLINA
DWELLING FIRE AND EXTENDED COVERAGE INSURANCE

ESTIMATED INVESTMENT EARNINGS ON UNEARNED
PREMIUM RESERVES AND ON LOSS RESERVES

EXPLANATORY NOTES

Line A-1
Direct earned premiums are the earned premiums for Dwelling insurance in North Carolina from page 15 of the Annual Statement.

Line A-2
The mean unearned premium reserve is determined by multiplying the direct earned premiums in line (1) by the ratio of the mean unearned premium reserve to the collected earned premium for calendar year ended 12/31/05 for all companies writing Dwelling insurance in North Carolina. These data are from page 15 of the Annual Statement.

	Fire	EC
1. Collected Earned Premium for Calendar Year ended 12/31/12	$237,079,266	$192,880,137
2. Unearned Premium Reserve as of 12/31/11	111,268,656	86,216,891
3. Unearned Premium Reserve as of 12/31/12	110,975,457	84,110,424
4. Mean Unearned Premium Reserve 1/2 [(2) + (3)]	111,122,057	85,163,658
5. Ratio (4) ÷ (1)	0.4687	0.4415

Line A-3
Deduction for prepaid expenses:
Production costs and a large part of the other company expenses in connection with the writing and handling of Dwelling policies, exclusive of claim adjustment expenses, are incurred when the policy is written and before the premium is paid. The deduction for these expenses is determined from data provided by the NCRB for the year ended 12/31/12.

Line B-2
Delayed remission of premium:
This deduction is necessary because of delay in remission and collection of premium to the companies, which amounts to approximately 50-75 days after the effective dates of the policies. Therefore, funds for the unearned premium reserve required during the initial days of all policies must be taken from the company's surplus.

1. Agents' balances for premiums due less than 90 days as a ratio to net written premium (based on data for all companies writing Dwelling insurance in North Carolina)	0.1789	0.1588
2. Factor to include effect of agents' balances or uncollected premiums overdue for more than 90 days (based on data provided by A. M. Best)	1.022	1.022
3. Factor for agents' balances (1) x (2)	0.183	0.162

Line C-2

The expected loss and loss adjustment expense ratio reflects the expense provisions for the year ended 12/31/12.

Line C-3

The mean loss reserve is determined by multiplying the incurred losses in line (2) by the North Carolina ratio of the mean loss reserves to the incurred losses in 2012 for Dwelling insurance. This ratio is based on North Carolina companies' Page 15 annual statement data and has been adjusted to include loss adjustment expense reserves.

	Fire	EC
1. Incurred Losses for Calendar Year 2012	66,518,503	73,137,289
2. Loss Reserves as of 12/31/11	56,782,146	76,934,173
3. Loss Reserves as of 12/31/12	44,814,079	38,555,719
4. Mean Loss Reserve 2012: 1/2 [(2) + (3)]	50,798,113	57,744,946
5. Ratio (4) ÷ (1)	0.764	0.790
6. Ratio of LAE Reserves to Loss Reserves (a)	0.238	0.238
7. Ratio of Incurred LAE to Incurred Losses (a)	0.158	0.158
8. Loss and LAE Reserve [(5)x(1.0+(6))/(1.0+(7))]	0.817	0.845

(a) Based on 2012 All-Industry Insurance Expense Exhibit (source: A.M. Best)

Line E

The rate of return is the ratio of net investment income earned to mean cash and invested assets. Net investment income is computed for all companies writing Dwelling insurance in North Carolina as follows:

Year	Net Investment Income Earned	Mean Cash and Invested Assets	Rate of Return
2012	49,236,879	1,400,656,655	3.52%

Line H

The average rate of Federal income tax was determined by applying the average tax rate for net investment income and the current tax rate applicable to realized capital gains (or losses) to the rates of return as calculated above.

	Rate of Return	Federal Income Tax Rate
Net Investment Income Earned	3.52%	0.229

The average rate of Federal income tax was determined by applying current tax rates to the distribution of investment income earned for all companies. These data are for 2012 from Best's Aggregates and Averages, Underwriting and Investment Exhibit, Part 1, Column 8.

NISS 2013 Calendar Year Annual Statement
NISS 2013 Financial Reconciliation Call
Annual Statement for Calendar Year 2014
Insurance Expense Exhibit for Calendar Year 2014
NCRB Calls North Carolina Expense Experience for 2010-2014

(b) The North Carolina Rate Bureau certifies that there is no evidence known to it or, insofar as it is aware following reasonable inquiry, to the statistical agencies involved that the data which were collected under the statistical plans identified in response (11)(a) above and used in the filing are not materially true and accurate representations of the experience of the companies whose data underlie such experience. While the Rate Bureau is aware that the collected data sometimes require corrections or adjustments, the Rate Bureau’s review of the data, the data collection process, and the ratemaking process indicates that the aggregate data are reasonable and reliable for ratemaking purposes. See also the prefiled testimony of R. Curry and B. Donlan.

(c) The attached Exhibit (11)(c) contains general descriptions of the editing procedures used to ensure data were collected in accordance with the applicable statistical plans.

North Carolina Dwelling Insurance Statistical Data

ISO Editing Procedures

1. Upon receipt of the data from each reporting company, checks are made to ensure that each record (i.e., the data reported for each exposure) has valid and readable information. This includes a check that the appropriate alpha-numeric codes have been utilized.

2. The records are then checked to ensure that each of the fields has a valid code in it (e.g., company numbers must be entered as four-digit numerals).

3. Relationship edits which evaluate the interrelationship between codes are then performed. For example, if a record indicates North Carolina, Dwelling Fire and Extended Coverage, Form 3, checks are made to ascertain that applicable interrelationships are maintained.

4. Distributional edits are performed to make sure that the reporting company has not erred in miscoding its data into a single class, territory, or other rating criteria due a systems problem or other error.

5. The resulting combined data from all the company records are reconciled with Statutory Page 14 Annual Statement data for that company.

6. After all of the ISO data are aggregated, a consolidated review of the data is conducted to determine overall reasonableness and accuracy. In this procedure the data are compared with previous statewide and territory figures. Areas of concern are identified and results are verified by checking back to the source data.

North Carolina Dwelling Insurance Statistical Data

Independent Statistical Service, Inc. (ISS)
Editing Procedures

The following narrative sets forth a general description of the editing procedures utilized by ISS to review North Carolina statistical data. All North Carolina experience submitted to ISS by affiliated companies undergoes standard procedures to ensure that the data is reported in accordance with the ISS state approved statistical plans.

The ISS review of the data takes place on two levels: analysis of individual company data and analysis of the aggregate data of all ISS reporting companies combined. These two separate functions will be treated in that order.

Analysis of Company Data

Analysis of company data includes: completeness checks, editing for valid statistical coding and checking the distribution of data within the various data elements.

1. Completeness Checks (Balancing and Reconciliation):

   Balancing and reconciliation procedures are used to determine completeness of reporting. Completeness means that ISS has received and processed all of the data due to be filed with ISS. First, totals of each company's processed data are compared to separate statewide transmittal totals supplied by the company. This step ensures that ISS has processed completely the experience included in the company's submission of data and that no errors occur during this processing. As a second check for completeness, the reported statistical data is reconciled to the Exhibit of Premiums and Losses, "Statutory Page 14", from the company's Annual Statement . It is a useful procedure in determining completeness because the annual statement represents an independent source of information.

2. Editing of Codes:

   Format and Readability

   Statistical data reported by affiliated companies must be filed in accordance with ISS approved statistical plans. This includes the requirement that the data must conform to the specific formats and technical specifications in order for ISS to properly read and process these submissions. The initial edit is a test of each company's submission to ensure it has been reported using the proper record format and that it meets certain technical requirements for the line of insurance being reported. Key fields are tested to ensure that only numeric information has been reported in fields defined as numeric, and that the fields have been reported in the proper position in the record.

   Edits

   The data items of information filed with the insurance company's experience are reported by using codes defined under the ISS statistical plans. For example, the various types of Policy Forms written on Dwelling Fire and Extended Coverage policies in North Carolina are defined in the Personal Lines Statistical Plan. Each definition for each data element has a unique code assigned to it which distinguishes it from other definitions. All data items applicable to North Carolina are defined in a similar manner in each of the ISS statistical plans and have codes assigned to properly identify each definition.

   All records reported to ISS are subjected to validation of the reported codes. This validation, called editing, is performed to assure that companies are reporting properly defined ISS Statistical Plan codes for North Carolina experience.

The purpose of the edit is to validate the statistical codes reported in each record. This validation is called a Relation Edit. A relational edit verifies that a reported code is valid in combination with one or more related data items. Relational edit tests are accomplished primarily through the use of specific edit tables applicable to each line of insurance.

In most cases, the experience data in the record is used in conjunction with the related codes and compared to an establishment or discontinued date for the code being validated. This ensures that specific codes are not being utilized beyond the range of time during which they are valid.

An example of a relational edit involves territory coding. Many territory code numbers are available under each statistical plan for various states, with various effective dates. However, only codes defined for North Carolina for the specific line being processed are valid in combination with North Carolina reported experience. Further, if a new code is erected, that code will be considered valid only if the date reported in the statistical record is equal or subsequent to the establishment date of the code.

3. Distributional Analysis:

The validation of the statistical coding is not by itself sufficient to assure the credibility of company data. Having assured the reporting of valid codes, the statistical agent must verify that valid entries are indeed reliable. Therefore, the data is also reviewed for reasonable distributions. The primary focus of this review is to establish that the statistical data reported by the company is a credible reflection of the company’s experience.

The distribution of company experience by specific data elements such as state, territory, policy form, and construction, for example, for the current reporting period is compared to company profiles of prior periods. In addition, ratios relevant to the line of insurance such as average premium, average loss, percent of volume, loss ratio and loss frequency are compared to industry averages. This historical comparison can highlight changes in the pattern of reporting.

The distributional analysis serves as an additional verification that systematic errors are not introduced during the production of data files submitted to ISS by our affiliated companies. Disproportionate amounts of premiums and/or losses in a particular class or territory, for example, can be detected using this technique.

Validation of Aggregate Data

After the individual company data has been reviewed, the data for all reporting companies is compiled to produce aggregate reports. The aggregate data represents the combined experience of the reporting companies. This data is also subjected to similar review procedures. To ensure completeness, run to run control techniques are applied. This involved balancing the totals of the aggregate runs to previously verified control totals. In this manner the aggregate data is monitored to ensure the inclusion of the appropriate company data.

The aggregate data is also reviewed for credibility through distributional analysis similar to that performed on the individual company data. Earned exposures (where applicable) and premiums and incurred losses and claims are used to calculate pure premiums, claim frequencies and claim costs for comparison to past averages. The analysis of the aggregate data centers on determining consistency over time by comparing several years of experience, by policy form and territory, for example. Through the application of these techniques, ISS is able to provide reliable insurance statistical data in North Carolina.

North Carolina Dwelling Insurance Statistical Data

NISS Editing Procedures

a. Every report received is checked for completeness. Every submission must include (1) an affidavit; (2) a letter of transmittal setting forth company control totals for the data being sent; (3) the data being reported on tape, cartridge, diskette or form to be keyed.

b. Individual company submissions are balanced to the company letter of transmittal to ensure that all data have been received and processed. After all four quarters of data have been received, the company reports are reconciled to the Statutory Page 14 Annual Statement amounts. The NISS Financial Reconciliation identifies any amounts needed to reconcile any differences between the company reported data and Annual Statement amounts.

c. Every company record submitted to NISS is verified through NISS edit software for its coding accuracy and conformance with NISS record layouts and instructions. NISS edits verify the accuracy of each code for each data element. Where possible, each data element is subjected to a relational edit whereby it will be checked for accuracy in conjunction with another field.

d. Individual company submissions are also subjected to a series of reasonability tests to determine that the current submission is consistent with previous company submissions, known changes in this line of business and statewide trends. NISS compares current quarter data to the previous quarter. This comparison is performed and analyzed by grouping data.

e. After all of the NISS data are combined, a review of this consolidated data is also performed. The aggregate data is compared on a year to year basis to again verify its reasonableness, similar to those checks employed on an individual company submission.

North Carolina Dwelling Insurance Statistical Data

AAIS Editing Procedures

The American Association of Insurance Services functions as an official statistical agent in the State of North Carolina for a number of lines of insurance, including Dwelling Fire and Extended Coverage. In this capacity, it provides for the administration of statistical programs in accordance with approved statistical plans on behalf of the Commissioner of Insurance. These plans, which were filed according to the requirements of the State of North Carolina, serve to insure a high quality of data reliability.

1. All statistical plans constitute permanent calls for data, which is due at AAIS within 60 days following the close of the period covered by the report.

2. Each data submission is accompanied by a transmittal that summarizes the detail data by state. The transmittal provides control totals to balance to the input and output of each step in our collection procedure. Signature of the company official responsible for data collection is required on the transmittal to certify the accuracy and completeness of the data submission.

3. The AAIS data collection procedure consists of several consecutive steps in order to further verify receipt of accurate and complete data from each company and ultimately aggregate the data into the final experience format.

4. The data collection procedure begins with entering the company number, date, type of media, and transmittal control totals for each line of insurance received into a log file. Company number, record counts, lines of insurance, year, quarter, type and number of media are recorded on a processing log and submitted to the computer room.

5. Operations will load the data into the computer and process all lines through a program which verifies certain key fields. The key fields are company number, line of insurance, transaction code and report period (quarter and year). All invalid key fields must be corrected before proceeding to the next step. Once a valid key field report is generated, Operations will copy all valid key field records to the edit file.

6. Upon receipt of the Moved to Edit report, the statistical department will verify that all records were copied from the stored data file to the edit file. All companies are then released by line and report period for editing.

7. The edit program has several functions and reports. They are:

   a. Data is balanced to transmittal totals.
   b. Each statistical field is edited to the valid codes in the statistical plan for the line being processed. Many fields are also cross edited. An example is deductible type and amount. All invalid codes are identified with an asterisk to the right of the code.
   c. Edit reports consist of a listing of invalid records, error summary report, month report, state report and field error detail report. Dwelling Fire and Extended Coverage has an additional report entitled "Data Consistency Report". This report shows the companies' average premium, pure premium, loss ratio, frequency and severity.

d. In addition to the edit report, we provide the company a distribution report. As you might expect, this report provides a distribution of the reported data for almost every single field of information captured by the statistical plan. This report is not only provided as a courtesy to the company, but it is always reviewed by AAIS staff to identify any reporting irregularities that wouldn't be caught by the edit program.

e. Along with the edit and distribution reports, there are additional review procedures in place to identify procedural reporting errors that may exist (e.g., cancellations and coverage changes). A great deal of time is spent on this item because of it's importance to the validity of the reported data.

f. Our analysis of a company's data are returned to the company with a customized letter indicating the type of action required. Depending on the severity of errors, companies are requested to make corrections or resubmit data.

8. AAIS provides assistance to all of its affiliated companies to ensure a continued high level of data quality. Statistical coding seminars designed to instruct company coders and respond to questions are scheduled annually. In addition to the seminars, AAIS has developed Statistical Training Manuals for some lines and pre-edit programs for company in-house use. Technical Services staff is available to train company personnel in all aspects of data collection, coding, statistical reporting and data processing.

12. INVESTMENT EARNINGS ON CAPITAL AND SURPLUS

Not applicable to Dwelling insurance.

13. LEVEL OF CAPITAL AND SURPLUS NEEDED TO SUPPORT PREMIUM WRITINGS WITHOUT ENDANGERING THE SOLVENCY OF MEMBER COMPANIES

(a) The aggregate premium to surplus ratios for the calendar years 2005-2014 for the company groups which have written North Carolina dwelling fire and extended coverage insurance are as follows:

Year	Fire	Extended Coverage
2005	1.225	1.196
2006	1.001	1.010
2007	0.948	0.967
2008	0.988	1.015
2009	0.950	0.938
2010	0.974	0.878
2011	1.174	1.006
2012	1.032	0.933
2013	0.854	0.860
2014	0.808	0.819

(b) The experience provides the best estimate of the future. See the prefiled testimony of D. Appel.

(c) The actual premium to surplus ratio for the property and casualty industry on a countrywide basis (based upon the latest A. M. Best data available at this time) is as follows:

	(000's omitted)
industry net earned premium 2015	516,411,971
industry surplus 2015	706,046,330
industry surplus 2014	705,896,183
average surplus	705,971,257
premium to average surplus	0.731

The actual level of capital and surplus needed to support premium writings without endangering the solvency of a company is dependent upon (among others) the financial structure and investments unique to each company, the relationship of the company with affiliated companies as a group (and the experience of the affiliated companies), the mix of business of each company, and the conditions of the economy as they affect each company's individual circumstances. The Rate Bureau is advised that the National Association of Insurance Commissioners, as one of several criteria, generally considers that a premium to surplus ratio for an individual company of 3 to 1 warrants close regulatory attention and monitoring with respect to the company's solvency position.

(d) The Rate Bureau has not allocated surplus by state and by line in preparing this filing. The Rate Bureau has treated surplus in this manner because each dollar of surplus is available to cover losses in excess of premium for each and every line.

STATISTICAL DATA TO COMPLY WITH NORTH CAROLINA
REQUIREMENTS FOR A DWELLING INSURANCE RATE FILING
AS PER 11 NCAC 10.1105

14. OTHER INFORMATION REQUIRED BY THE COMMISSIONER

See attached Exhibits (14)(a), (b), (c) and (d).

Exhibit (14)(a)

See the pre-filed testimony of D. Appel, J. Vander Weide, R. Curry, P. Anderson and B. Donlan.

Not applicable to Dwelling insurance.

There have been no previous Dwelling insurance rate filings made within the past five years.

The following changes in methodology from those used in the January 4, 2011 Dwelling insurance rate filing have been incorporated into this filing:

1. In this filing, the extended coverage modeled hurricane losses were provided by Aon Benfield, and those losses are the blended results of the AIR Worldwide and RMS hurricane models. In the prior filing, only the AIR model was used. The blended results of the models were used in all analyses in the filing where modeled hurricane losses are used, whereas in the prior filing only the results of the AIR model were used.

2. In this filing, in addition to other variables provided as input to the hurricane models, year of construction data was also provided.

3. In this filing, the net cost of reinsurance provision was based on calculations by Aon Benfield. In the prior filing, the net cost of reinsurance provision was based on calculations by Milliman. In developing that provision, Aon Benfield used its actual market experience and determined the reinsurance premium based on the latest available information on actual market prices, including Aon Benfield's database on actual reinsurance prices and input from Aon Benfield brokers; Milliman determined that component by estimating the losses that would be ceded to the program based on the modeled losses and loading those ceded losses for reinsurer expenses and the cost of reinsurer capital.

4. In this filing, the net cost of reinsurance was allocated to individual territory. In the prior filing, it was allocated to zone (groups of territories).

5. In this filing, the underwriting profit provision was applied uniformly on a statewide basis. In the prior filing, the underwriting profit was allocated to zone.

6. In this filing, a lower loss adjustment expense (LAE) provision was used for modeled hurricane losses as compared to non-modeled losses. In the prior filing, the same LAE provision was used for all losses.

7. In this filing, the modeled hurricane losses provided by Aon Benfield were already trended to the prospective experience period. In the prior filing, the modeled hurricane losses provided by AIR were untrended, and trend was applied to those losses as part of the rate level calculation.

See also the pre-filed testimony of R. Curry, P. Anderson, B. Donlan, D. Appel, E. Henderson and R. Fox.

NORTH CAROLINA

DWELLING INSURANCE

SECTION F – REVISION OF DWELLING INSURANCE TERRITORY DEFINITIONS

REVISION OF DWELLING INSURANCE TERRITORY DEFINITIONS

OVERVIEW

This filing revises the Dwelling insurance territory definitions to be the same as the territory definitions approved for Homeowners insurance that became effective on June 1, 2015.

CONTENTS OF THIS SECTION

- Pages F-2-5 – Revised Territory Definitions
- Pages F-6-9--Maps
- Pages F-10-30 – Miscellaneous Manual Rules

REVISED TERRITORY DEFINITIONS

Pages F-2 through F-5 show the revised manual rule (shown in underline/strikethrough format) for assigning territory and the revised territory definitions.

1. TERRITORY ASSIGNMENTS

If a territory shown is defined in terms of United States Postal Service (USPS) ZIP code:

A. Determine the applicable rating territory based on the location of the dwelling.

B. An insured's rates shall not be changed solely because the USPS changed his or her ZIP code and the physical boundaries of a rating territory shall be determined by the ZIP code boundaries in effect at the time of the latest rate filing defining the territory.

Territory boundaries in North Carolina are concurrent with USPS ZIP code boundaries in effect as ofJuly 1, 2013. If the USPS introduces a new ZIP code or realigns a ZIP code boundary after July 1, 2013, the new ZIP code may not yet be listed in Rule **2.C.** If this is the case, assign the rating territory based on the ZIP code boundary that formerly applied to the dwelling before the USPS changed the ZIP code.

Formatted: Font: Not Bold

1. TERRITORY DEFINITIONS – (For all Coverages and Perils Other than Earthquake).

Assign the applicable territory using the following order of priority.

A. Cities

MISCELLANEOUS MANUAL RULES

Pages F-11 through F-30 show various manual rules that are revised solely for the purpose of reflecting new territory numbers.

RULE A1.
SPECIAL STATE REQUIREMENTS

A. Special Provisions Endorsement DP 32 32

Use this endorsement with all Dwelling Policies.

B. Windstorm Exterior Paint And Waterproofing Exclusion Endorsement DP 32 61

Use this endorsement with **all** Dwelling Policies covering Extended Coverage in Territories ~~07~~110 and ~~08~~120.

C. Company Rates/State Rates

References in the manual to "state company rates" means "state rates" in North Carolina.

D. Flood, Earthquake, Mudslide, Mudflow, Landslide, Or Windstorm Or Hail Insurance Notice

North Carolina law provides that an insurer selling property insurance that does not provide coverage for the perils of flood, earthquake, mudslide, mudflow, landslide, or windstorm or hail shall provide a specific notice (a "warning" set forth in the related statute) to the policyholder as to which of the listed perils are not covered under the policy.

The required notice must be:

1. Provided upon issuance and renewal of each policy;
2. In Times New Roman 16-point font or another equivalent font; and
3. Must be included in the policy on a separate page immediately before the Declarations page.

The following warning, citing which peril is not covered, must be furnished with each new policy and upon each renewal:

"WARNING: THIS PROPERTY INSURANCE POLICY DOES NOT PROTECT YOU AGAINST LOSSES FROM [FLOODS], [EARTHQUAKES], [MUDSLIDES], [MUDFLOWS], [LANDSLIDES], [WINDSTORM OR HAIL]. YOU SHOULD CONTACT YOUR INSURANCE COMPANY OR AGENT TO DISCUSS YOUR OPTIONS FOR OBTAINING COVERAGE FOR THESE LOSSES. THIS IS NOT A COMPLETE LISTING OF ALL OF THE CAUSES OF LOSSES NOT COVERED UNDER YOUR POLICY. YOU SHOULD READ YOUR ENTIRE POLICY TO UNDERSTAND WHAT IS COVERED AND WHAT IS NOT COVERED."

E. North Carolina Endorsement DP 32 46

Use this endorsement with all Dwelling Policies.

RULE A3.
WINDSTORM OR HAIL EXCLUSION – TERRITORIES ~~07, 08, 48, 49 AND 52~~110, 120, 130, 140, 150, and 160 ONLY

A. Introduction

The peril of Windstorm or Hail may be excluded if:

1. The property is located in an area eligible for such coverage from the North Carolina Insurance Underwriting Association; and

2. A Windstorm or Hail Rejection Form is secured and maintained by the company.

B. Premium Computation

1. To compute the Extended Coverage Non-seasonal or Seasonal Base Premium or the Broad or Special Form Non-seasonal Base Premium:

(a) Determine the Extended Coverage, Broad or Special Form Key Premium as described in Rule **301.**

(b) Subtract the Windstorm Or Hail Exclusion Credit shown on the state rates from the Extended Coverage, Broad or Special Form Key Premium.

(c) Multiply the Extended Coverage, Broad or Special Form Key Premium excluding Windstorm or Hail Coverage developed in Paragraph **(b)** by the Key Factor for the desired limit of liability.

2. To compute the Seasonal Broad or Special Form Base Premium:

(a) Determine the **DP 00 01** Extended Coverage Key Premium as described in Rule **301.**

(b) Multiply the **DP 00 01** Extended Coverage Key Premium by the appropriate Seasonal factor shown in Table **301.A.#26(LC)** or Table **301.A.#29(LC)** to determine the Seasonal Broad or Special Form Key Premium.

(c) Subtract the Windstorm Or Hail Exclusion Base Credit shown on the state rates from the Seasonal Broad or Special Form Key Premium determined in Paragraph **(b).**

(d) Multiply the Seasonal Broad or Special Form Key Premium excluding Windstorm Or Hail Coverage developed in Paragraph **(c)** by the Key Factor for the desired limit of liability.

C. Endorsement

Use Windstorm Or Hail Exclusion – North Carolina Endorsement **DP 32 87.**

When Windstorm Or Hail Exclusion Endorsement **DP 32 87** is attached to the policy, enter the following in Declarations:

"This policy does not provide coverage for the peril of Windstorm or Hail."

RULE A9.
WINDSTORM MITIGATION PROGRAM

A. Introduction

With respect to risks located in Territories ~~07, 08, 48, 49 and 52~~110, 120, 130, 140,150 and 160, premium credits shall be made available for insureds who build, rebuild or retrofit certain residential dwellings, in accordance with specified standards, to better resist hurricanes and other catastrophic windstorm events.

B. Eligibility

1. A dwelling may be eligible for a premium credit if:

a. The dwelling has been designed and constructed in conformity with, and has been certified as meeting, the Hurricane, Tornado and Hail and High Wind requirements of the Hurricane Fortified for Safer Living® (Fortified) program promulgated by the Institute for Business and Home Safety® (IBHS);

b. The dwelling has been certified as meeting, either the Bronze, Silver or Gold hurricane mitigation measures in the Hurricane Fortified for Existing Homes® program promulgated by the IBHS;

c. The dwelling contains Opening Protection in accordance with the qualification requirements set forth in Paragraph **D.1.b.;** or

d. The dwelling contains a Total Hip Roof.

2. The provisions of this rule do not apply:

a. To condominiums or tenant policies.

b. If the policy excludes the peril of Windstorm or Hail.

c. To dwellings under construction.

d. To Coverage **C** – Personal Property unless the policy also provides Coverage **A** – Dwelling.

e. To mobile homes.

3. To be eligible for a premium credit, mitigation features are not required for adjacent structures including, but not limited to, detached garages, storage sheds, barns, apartments, etc. located on the insured premises.

C. Proof of Compliance

The named insured must submit proof that the windstorm loss mitigation features and/or construction techniques have been implemented for each of the following:

1. IBHS Hurricane Fortified for Safer Living®

The named insured shall provide a copy of the proper designation certificate from the IBHS issued for the dwelling.

2. IBHS Hurricane Fortified for Existing Homes®

The named insured shall provide a copy of the proper designation certificate from the IBHS issued for the dwelling. The credit will apply for five years from the date of designation. In order to continue receiving the mitigation credit after five years, the dwelling must be re-inspected and re-designated by the IBHS. If the IBHS designation expires, the applicable mitigation credit will expire upon renewal.

3. Opening Protection

The existence of Opening Protection may be verified by proof of installation.

4. Total Hip Roof

The existence of a hip roof may be verified through photographs of the roof.

D. Description of Mitigation Credit Tables

With respect to dwellings to which this rule applies and subject to all other provisions of this Windstorm Mitigation Program, the following approved and properly maintained windstorm mitigation features shall be recognized for a premium credit.

1. Mitigation Features

a. IBHS Hurricane Fortified Homes

(1) A home designated by the IBHS as Hurricane Fortified for Safer Living®.

(2) A home designated by the IBHS as Hurricane Fortified for Existing Homes®, including:

(i) Hurricane Fortified for Existing Homes Bronze, Option 1

(ii) Hurricane Fortified for Existing Homes Bronze, Option 2

(iii) Hurricane Fortified for Existing Homes Silver, Option 1

(iv) Hurricane Fortified for Existing Homes Silver, Option 2

(v) Hurricane Fortified for Existing Homes Gold, Option 1

(vi) Hurricane Fortified for Existing Homes Gold, Option 2

b. Opening Protection

(1) Building opening protective features must have been tested and/or certified as having met standards of the American Society for Testing and Materials ASTM E 1886 (standard test method) and ASTM E 1996 (standard specification). Such opening protective features shall be considered qualified.

(2) Qualifying opening protection must be present at all exterior envelope openings (such as windows, garage doors, sliding doors, swinging doors, glass block, door sidelights, and skylights) on the dwelling structure. For the credit to apply, the following conditions must be met:

(i) In accordance with the qualification requirements set forth in Paragraph **D.1.b.(1):**

(a) All exterior building envelope openings with glazing (e.g. glass) shall have qualified impact-resistant and wind pressure-resistant opening protection;

(b) All exterior building envelope openings without glazing shall have qualified wind pressure-resistant opening protection; and

(c) All garage doors (with and without glazing) shall meet or exceed a qualified minimum pressure resistance.

(ii) Opening protection must be installed by a qualified contractor, according to the manufacturer's specifications.

(iii) Impact-resistant protective devices must not be made of wood structural panels, such as OSB or plywood, or be homemade.

c. Total Hip Roof

A Total Hip Roof is a roof that slopes in four directions such that the end formed by the intersection of slopes is a triangle.

E. Premium Determination

1. To compute the Extended Coverage Non-seasonal or Seasonal Base Premium or the Broad or Special Form Non-seasonal Base Premium:

a. Determine the Extended Coverage, Broad or Special Form Key Premium as described in Rule **301.**

b. Subtract the Coverage **A** Windstorm Loss Mitigation Credit shown on the state rates from the Coverage **A** Extended Coverage, Broad or Special Form Key Premium. If applicable, also subtract the Coverage **C** Windstorm Loss Mitigation Credit, shown on the state rates from the Coverage **C** Extended Coverage, Broad or Special Form Key Premium.

c. Multiply the Extended Coverage, Broad or Special Form Key Premium excluding Windstorm Loss Mitigation Coverage developed in Paragraph **1.b.** by the Key Factor for the desired limit of liability.

2. To compute the Seasonal Broad or Special Form Base Premium:

a. Determine the **DP 00 01** Extended Coverage Key Premium as described in Rule **301.**

b. Multiply the **DP 00 01** Extended Coverage Key Premium by the appropriate Seasonal factor shown in Table **301.A.#26(LC)** or Table **301.A.#29(LC)** to determine the Seasonal Broad or Special Form Key Premium.

c. Subtract the Coverage **A** Windstorm Loss Mitigation Credit shown in the state rates from the Coverage **A** Seasonal Broad or Special Form Key Premium determined in Paragraph **2.b.** If applicable, also subtract the Coverage **C** Windstorm Loss Mitigation Credit, shown on the state rates from the Coverage **C** Seasonal Broad or Special Form Key Premium.

d. Multiply the Seasonal Broad or Special Form Key Premium excluding Windstorm Loss Mitigation Coverage developed in Paragraph **2.c.** by the Key Factor for the desired limit of liability.

3. Mitigation Feature credits cannot be combined, except for Total Hip Roof and Opening Protection.

4. If mitigation measures are installed midterm, premium adjustment is required on a pro rata basis.

406. DEDUCTIBLES

Rule **406.** is replaced by the following:

All policies are subject to a deductible that applies to loss from all perils, except Earthquake. A separate deductible type applies to Earthquake Coverage as described in Rule **509.**

Refer to the Earthquake Coverage rule for the applicable deductible provision.

A. Base Deductible

$500 Deductible

B. Optional Deductibles

1. All Perils Deductibles

To compute the premium for these options, multiply the Base Premium for the Base Deductible by the factors selected from the following tables:

Fire				
Coverage A, B, D Or E And Coverage Options For Buildings And Non-building Structures				
	Coverages A, B, D Or E Limit (Expressed In $)			
Deductibles	**Up To 125,000**	**125,001 To 175,000**	**175,001 To 250,000**	**250,001 And Above**
$ 100*	1.080	1.070	1.060	1.050

2. **Windstorm Or Hail Deductibles**

   When the policy covers the peril of Windstorm or Hail, the following deductible options may be used in conjunction with a deductible applicable to all other perils covered under Extended Coverage, Broad or Special Forms. They may not be used on a policy in conjunction with a Named Storm deductible as described in Paragraph **3.**

a. Percentage Deductibles

(1) Deductible Amounts

This option provides for higher Windstorm or Hail percentage deductibles of 1%, 2%, 5%, 7.5% and 10% of the limit of liability that applies to Coverage **A, B, D** or **E,** whichever is greatest, when the dollar amount of the percentage deductible selected exceeds the amount of the All Other Perils deductible. This option is not available for policies covering only personal property.

(2) Endorsement

Use Windstorm Or Hail Percentage Deductible Endorsement **DP 03 12.**

(3) Declarations Instructions

Enter, on the policy Declarations, the percentage amount that applies to Windstorm or Hail and the dollar amount that applies to All Other Perils. For example:

Deductible – Windstorm or Hail 2% of the Coverage **A** limit and $500 for All Other Perils.

(4) Deductible Application

In the event of a Windstorm or Hail loss to covered property, the dollar amount is deducted from the total of the loss for all coverages.

(5) Coverage Options

The deductible factors for Coverage **A, B, D** or **E** and Coverage Options For Buildings And Non-building Structures differ by the deductible percentage amounts that apply to Windstorm or Hail, deductible amounts that apply to other perils, and the Coverage **A, B, D** or **E** limit.

The deductible factors for Coverage **C** and Other Personal Property Coverage Options differ by the deductible percentage amounts that apply to Windstorm or Hail and the deductible amounts that apply to other perils.

(6) Use Of Factors

The factors for the Windstorm or Hail Deductibles incorporate the factors for the All Perils Deductibles. Do not use the factors for the All Perils Deductibles when rating a policy with a higher Windstorm or Hail deductible.

(7) Deductible Factors

When the property is located in an area serviced by the North Carolina Insurance Underwriting Association (NCIUA – Territories ~~07, 08, 48, 49 and 52~~110, 120, 130, 140, 150 and 160), additional calculations must be performed to ensure that the premium credit applied to the deductible is **not** greater than the premium credit that would be applied if the peril of Windstorm or Hail were excluded from the policy.

(a) Property **Not** Located in Area Serviced by the NCIUA

To compute the premium for this provision, multiply the Extended Coverage, Broad or Special Form Base Premium for the Base Deductible for each coverage insured under the policy by the factor selected for the desired windstorm or hail deductible options from the following tables.

(b) Property **Is** Located in Area Serviced by the NCIUA

To determine if an "adjusted deductible credit" or the calculated deductible credit applies, complete each of the following steps:

Step **1.** Multiply the windstorm or hail exclusion credit shown in the state rates, under Additional Rule **A3.** Windstorm Or Hail Exclusion – Territories ~~07, 08, 48, 49 And 52 Only~~110 120, 130, 140, 150 And 160 Only, by the Key Factor, for the same amount of insurance used to determine the Extended Coverage, Broad or Special Form Base Premium.

Step **2.** Multiply the result determined in Step **1.** by .9 to determine the "adjusted deductible credit".

Step **3.** Select the factor for the desired windstorm or hail deductible option from the following tables and subtract the factor from unity (1.00).

Step **4.** Multiply the factor determined in Step **3.** by the Extended Coverage, Broad or Special Form Base Premium. The result is the windstorm or hail deductible credit.

Step **5.** Compare the results in Steps **2.** and **4.** If the result in:

Step **2.** is **less than** the result in Step **4.,** to compute the premium, subtract the "adjusted deductible credit" from the Extended Coverage, Broad or Special Form Base Premium.

Step **2.** is **greater than or equal to** Step **4.,** multiply the Extended Coverage, Broad or Special Form Base Premium by the factor for the desired windstorm or hail deductible option

Table 406.B.2.a.(7)#4 Coverage C And Other Personal Property Windstorm Or Hail Percentage Deductibles

Formatted: Not Highlight

b. Higher Fixed-Dollar Deductibles

(1) Deductible Amounts

This option provides for higher Windstorm or Hail fixed-dollar deductible amounts of $1,000, $2,000, $5,000, $7,500 and $10,000 when the dollar amount of the higher fixed-dollar deductible selected exceeds the amount of the All Other Perils deductible. This option is not available for policies covering only personal property.

(2) Endorsement

An endorsement is not required.

(3) Declarations Instructions

Separately enter, on the policy Declarations, the deductible amounts that apply to Windstorm or Hail and All Other Perils. For example: $1,000 for Windstorm or Hail and $500 for All Other Perils.

(4) Deductible Application

In the event of a Windstorm or Hail loss to covered property, the dollar amount is deducted from the total of the loss for all coverages.

(5) Coverage Options

The deductible factors for Coverage **A, B, D** or **E** and Coverage Options For Buildings And Non-building Structures differ by the deductible amounts that apply to Windstorm or Hail and to other perils and the Coverage **A, B, D** or **E** limit.

The deductible factors for Coverage **C** and Other Personal Property Coverage Options differ by the deductible amounts that apply to Windstorm or Hail and other perils.

(6) Use Of Factors

The factors for the Windstorm or Hail Deductibles incorporate the factors for the All Perils Deductibles. Do not use the factors for the All Perils Deductibles when rating a policy with a higher Windstorm or Hail deductible.

(7) Deductible Factors

When the property is located in an area serviced by the North Carolina Insurance Underwriting Association (NCIUA – Territories ~~07, 08, 48, 49 and 52~~110, 120, 130, 140, 150 and 160), additional calculations must be performed to ensure that the premium credit applied to the deductible is **not** greater than the premium credit that would be applied if the peril of Windstorm or Hail were excluded from the policy.

(a) Property **Not** Located in Area Serviced by the NCIUA

Multiply the Extended Coverage, Broad or Special Form Base Premium for the Base Deductible for each coverage insured under the policy by the factor selected for the desired windstorm or hail

deductible options from the following tables.

(b) Property **Is** Located in Area Serviced by the NCIUA

To determine if an "adjusted deductible credit" or the calculated deductible credit applies, complete each of the following steps:

Step **1.** Multiply the windstorm or hail exclusion credit shown in the state rates under Additional Rule **A3.** Windstorm Or Hail Exclusion – Territories ~~07, 08, 48, 49 And 52 Only~~110, 120, 130, 140, 150 And 160 Only, by the Key Factor, for the same amount of insurance used to determine the Extended Coverage, Broad or Special Form Base Premium.

Step **2.** Multiply the result determined in Step **1.** by .9 to determine the "adjusted deductible credit".

Step **3.** Select the factor for the desired windstorm or hail deductible option from the following tables and subtract the factor from unity (1.00).

Step **4.** Multiply the factor determined in Step **3.** by the Extended Coverage, Broad or Special Form Base Premium. The result is the windstorm or hail deductible credit.

Step **5.** Compare the results in Steps **2.** and **4.** If the result in:

Step **2.** is **less than** the result in Step **4.,** to compute the premium, subtract the "adjusted deductible credit" from the Extended Coverage, Broad or Special Form Base Premium.

Step **2.** is **greater than or equal to** Step **4.,** multiply the Extended Coverage, Broad or Special Form Base Premium by the factor for the desired windstorm or hail deductible option.

Table 406.B.2.b.(7)#4 Coverage C And Other Personal Property Windstorm Or Hail Fixed-dollar Deductibles

3. Named Storm Deductibles – Territories ~~07, 08, 48, 49 and 52~~110, 120, 130, 140, 150 and 160

When the policy covers the peril of Windstorm or Hail, the following deductible options may be used in the listed territories in conjunction with the deductible applicable to all other Perils under Extended Coverage, Broad or Special Forms. They may not be used on a policy in conjunction with a Windstorm or Hail deductible as described in Paragraph **2.**

a. Percentage Deductibles – Territories ~~07, 08, 48, 49 and 52 Only~~110, 120, 130, 140,150 And 160 Only

(1) Deductible Amounts

This option provides for higher Named Storm percentage deductibles of 1%, 2%, 5%, 7.5% and 10% of the limit of liability that applies to Coverage **A, B, D** or **E,** whichever is greatest, when the dollar amount of the percentage deductible selected exceeds the amount of the All Other Perils deductible. This option is not available for policies covering only personal property.

(2) Endorsement

Use Named Storm Deductible – North Carolina Endorsement **DP 32 18.**

(3) Declarations Instructions

Enter, on the policy Declarations, the percentage amount that applies to Named Storm and the dollar amount that applies to All Other Section **I** Perils. For example:
Deductible – Named Storm 2% of Coverage **A** limit and $500 for all other perils.

(4) Deductible Application

In the event of a Named Storm loss to covered property, the dollar amount is deducted from the total of the loss for all coverages.

(5) Coverage Options

The deductible factors for Coverage **A, B, D** or **E** and Coverage Options For Buildings and Non-building Structures differ by the deductible percentage amounts that apply to Named Storm, deductible amounts that apply to other perils and the Coverage **A, B, D** or **E** limit.
The deductible factors for Coverage **C** and Other Personal Property Coverage Options differ by the deductible percentage amounts that apply to Named Storm and the deductible amounts that apply to other perils.

(6) Use Of Factors

The factors displayed in Paragraph **(7)** incorporate the factors for the All Perils Deductibles. Do not use the factors for the All Perils Deductibles when rating a policy with a higher Named Storm deductible.

(7) Deductible Factors

When the property is located in an area serviced by the North Carolina Insurance Underwriting Association (NCIUA – Territories ~~07, 08, 48, 49 and 52~~110, 120,130,140,150 and 160), additional calculations must be performed to ensure that the premium credit applied for the deductible is **not** greater than the premium credit that would be applied if the peril of Windstorm or Hail were excluded from the policy.
To determine if an "adjusted deductible credit" or the calculated deductible credit applies, complete each of the following steps:

Step **1.** Multiply the windstorm or hail exclusion credit shown in the state rate pages, under Additional Rule **A3.** Windstorm Or Hail Exclusion – Territories ~~07, 08, 48, 49 And 52 Only~~110, 120, 130, 140,150 And 160 Only, by the Key Factor, for the same amount of insurance used to determine the Extended Coverage, Broad or Special Form Base Premium.

Step **2.** Multiply the result determined in Step **1.** by .9 to determine the "adjusted deductible credit".

Step **3.** Select the factor for the desired named storm deductible option from the following table and subtract that factor from unity (1.00).

Step **4.** Multiply the factor determined in Step **3.** by the Extended Coverage, Broad or Special Form Base Premium. The result is the named storm deductible credit.

Step **5.** Compare the results in Steps **2.** and **4.** If the result in:

Step **2.** is **less** than the result in Step **4.,** to compute the premium, subtract the "adjusted deductible credit" from the Extended Coverage, Broad or Special Form Base Premium.

Step **2.** is **greater than or equal to** the result in Step **4.,** multiply the Extended Coverage, Broad or Special Form Base Premium by the factor for the desired named storm deductible option.

Table 406.B.3.a.(7)#2 Coverage C And Other Personal Property Named Storm Percentage Deductibles

Formatted: Not Highlight

b. Higher Fixed-dollar Deductibles – Territories ~~07, 08, 48, 49 And 52 Only~~110, 120,130,140,150 And 160 Only

(1) Deductible Amounts

This option provides for higher Named Storm Fixed-dollar deductible amounts of $1,000, $2,000, $5,000, $7,500 and $10,000 when the dollar amount of the higher fixed-dollar deductible selected exceeds the amount of the All Other Perils deductible. This option is not available for policies covering only personal property.

(2) Endorsement

Use Named Storm Deductible – North Carolina Endorsement **DP 32 18.**

(3) Declarations Instructions

Enter, on the policy Declarations, the deductible amounts that apply to Named Storm and All Other Perils. For example: $1,000 for Named Storm and $500 for All Other Perils.

(4) Deductible Application

In the event of a Named Storm loss to covered property, the dollar amount is deducted from the total of the loss for all coverages.

(5) Coverage Options

The deductible factors for Coverage **A, B, D** or **E** and Coverage Options For Buildings And Non-building Structures differ by the deductible amounts that apply to Named Storm and to other perils and the Coverage **A, B, D** or **E** limit.

The deductible factors for Coverage **C** and Other Personal Property Coverage Options differ by the deductible amounts that apply to Named Storm and to other perils.

(6) Use Of Factors

The factors displayed in Paragraph **(7)** incorporate the factors for the All Perils Deductibles. Do not use the factors for the All Perils Deductibles when rating a policy with a higher Named Storm deductible.

(7) Deductible Factors

When the property is located in an area serviced by the North Carolina Insurance Underwriting Association (NCIUA – Territories ~~07, 08, 48, 49 and 52~~110, 120,130,140,150 and 160), additional calculations must be performed to ensure that the premium credit applied for the deductible is not greater than the premium credit that would be applied if the peril of Windstorm or Hail were excluded from the policy.

To determine if an "adjusted deductible credit" or the calculated deductible credit applies, complete each of the following steps:

Step **1.** Multiply the windstorm or hail exclusion credit shown in the state rate pages, under Additional Rule **A3.** Windstorm Or Hail Exclusion – Territories ~~07, 08, 48, 49 And 52 Only~~110, 120,130,140,150 And 160 Only, by the Key Factor, for the same amount of insurance used to determine the Extended Coverage, Broad or Special Form Base Premium.

Step **2.** Multiply the result determined in Step **1.** by .9 to determine the "adjusted deductible credit".

Step **3.** Select the factor for the desired named storm deductible option from the following table and subtract that factor from unity (1.00).

Step **4.** Multiply the factor determined in Step **3.** by the Extended Coverage, Broad or Special Form

Base Premium. The result is the named storm deductible credit.

Step **5.** Compare the results in Steps **2.** and **4.** If the result in:

Step **2.** is **less** than the result in Step **4.,** to compute the premium, subtract the "adjusted deductible credit" from the Extended Coverage, Broad or Special Form Base Premium.

Step **2.** is **greater than or equal to** the result in Step **4.,** multiply the Extended Coverage, Broad or Special Form Base Premium by the factor for the desired named storm deductible option.

Territories ~~07, 08, 48, 49, 52~~110, 120, 130, 140, 150 and 160 (Beach & Coastal)

* Base Class for Fire is Protection Class 5, Frame Construction; $15,000 Coverage A, $6,000 Coverage C.
Base Class for Extended Coverage is Form DP-01, Frame Construction; $15,000 Coverage A, $6,000 Coverage C.

Note: This chart furnishes information required by N.C. Gen. Stat. 58-36-15 (d3) which will become effective on October 1, 2017. The Wind and Hail percentages include losses from hurricanes, tornadoes, straight line wind storms, hail storms and other such events.

Definitions, RB-1, Exhibit G

Model Parameters

	RMS	AIR
Model Version	RiskLink v15.0	Touchstone v3.1
Event Set	2015 Historical	100k Standard
Demand Surge	Included	Included
Storm Surge	Excluded	Excluded

RMS Fields

Code	Name	Definition
EventID	Event Identifier	Event identification code, which represents a specific event.
RATE	Rate	Frequency at which a given event occurrs according to the RMS model, or the likelihood that an event will occur. The output of the RMS model uses this criteria for frequency of an event rather than assigning each event to a specific catalog year.

AIR Fields

Code	Name	Definition
EventID	Event Identifier	Event identification code, which represents a specific event.
Year	Catalog Year	AIR uses a stochastic catalog containing potential scenarios of events in a year. The "year" field represents the simulated year in the catalog.

Loss Fields (RMS and AIR)

Code	Name	Definition
GU_Loss	Ground Up Loss	Modeled loss that does not take into account policy limits or deductibles. These losses also include 9.9% trend and a 6% Cat LAE factor.
GR_Loss	Gross Loss	Modeled loss taking into account policy limits and deductibles. These losses also include 9.9% trend and a 6% Cat LAE factor.
wDS	Demand Surge	Includes amplification of some losses to account for the fact that after a large catastrophe occurrs, demand for building materials and/or labor increases, causing the cost of those to increase as well.
xDS	without Demand Surge	Demand Surge excluded.

Windfall Parameter Fields

Name	Description
Landfall State	State in which storm made first US landfall or bypass.
Landfall County	US County in which storm made first US landfall or bypass.
SS_Intensity	Saffir-Simpson storm intensity of the storm, based on wind speed at the point wind speed is assigned (below).

RMS Landfall -- Maximum wind speed at the 6 hour point before landfall.
RMS Bypass -- Maximum wind speed at the bypass gate center.

AIR Landfall and Bypass -- Maximum wind speed at point 1 hour prior to landfall / bypass.

EventID	Year	GU_Loss_wDS	GR_Loss_wDS	GU_Loss_xDS	GR_Loss_xDS	LandfallState	LandfallCounty	SS_Intensity
