---

A special thanks to Janice Williams with Carolinas Center for Injury Prevention – Carolinas Medical Center for her countless hours of work on this toolkit based on best practices in the Charlotte Mecklenburg area. In addition for her commitment to the injury area by always being current how data can help us to address accidental poisonings. A special thanks to Special Agent Terry Beckstrom with the Drug Enforcement Agency for his willingness to create a statewide take-back program, his dedication to helping us document the best practices from across the state and for being the person who found solutions rather than settled for obstacles in this process.
